

DENSE FLOW CONTROL PANELS

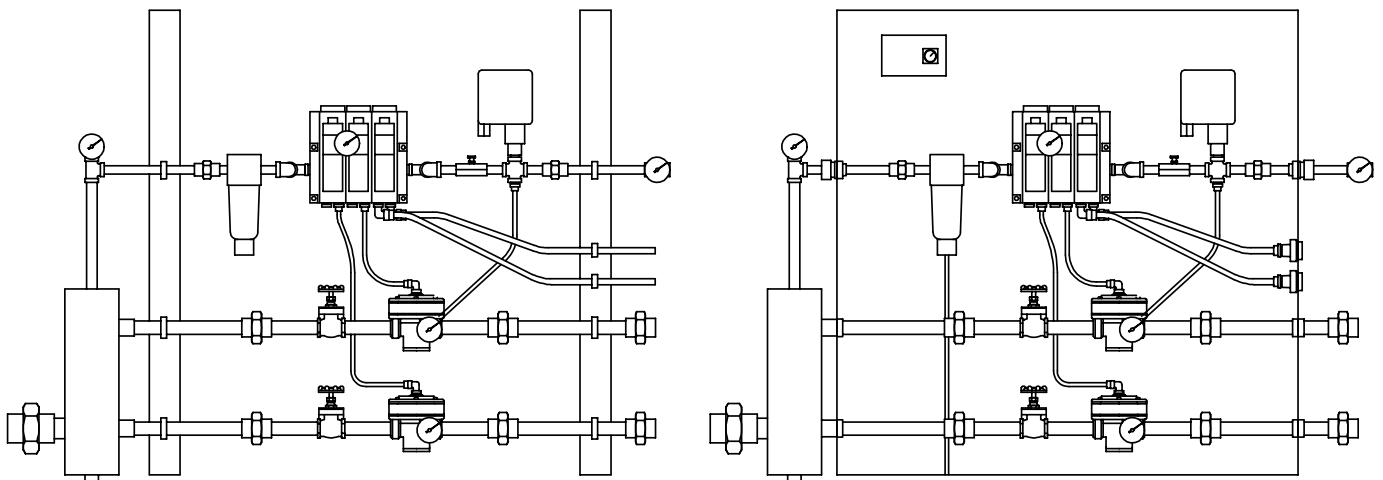

BACK PANEL

FRONT FACE

THE DENSE FLOW ELECTRIC CONTROL PANEL is designed to meet your specific control applications whether your needs are a simple start-stop station or a fully automated system. The panels come equipped with relay logic or a programmable controller to control the sequence and operations of your *Dense Flow* Pneumatic Conveying System.

THE DENSE FLOW AIR CONTROL PANEL is designed to work in conjunction with the Electric control panel to automatically regulate and control the airflow to the system. Simple single material systems to multi-station multi-material systems can be designed. Air Control Panels are pre-piped and can be installed in a Nema style enclosure as an option.

NOTE: Specifications and dimensions subject to change.
